

MILS SPARTAN

MULTI-LAYERED STAINLESS STEEL HEAD GASKETS

Strong, Simple to Use & Ready for Battle.

Advanced manufacturing ensures trouble free, bolt-on performance without extra sealants.

Available in 5 thicknesses: .028" .039" .051" .066" .075"

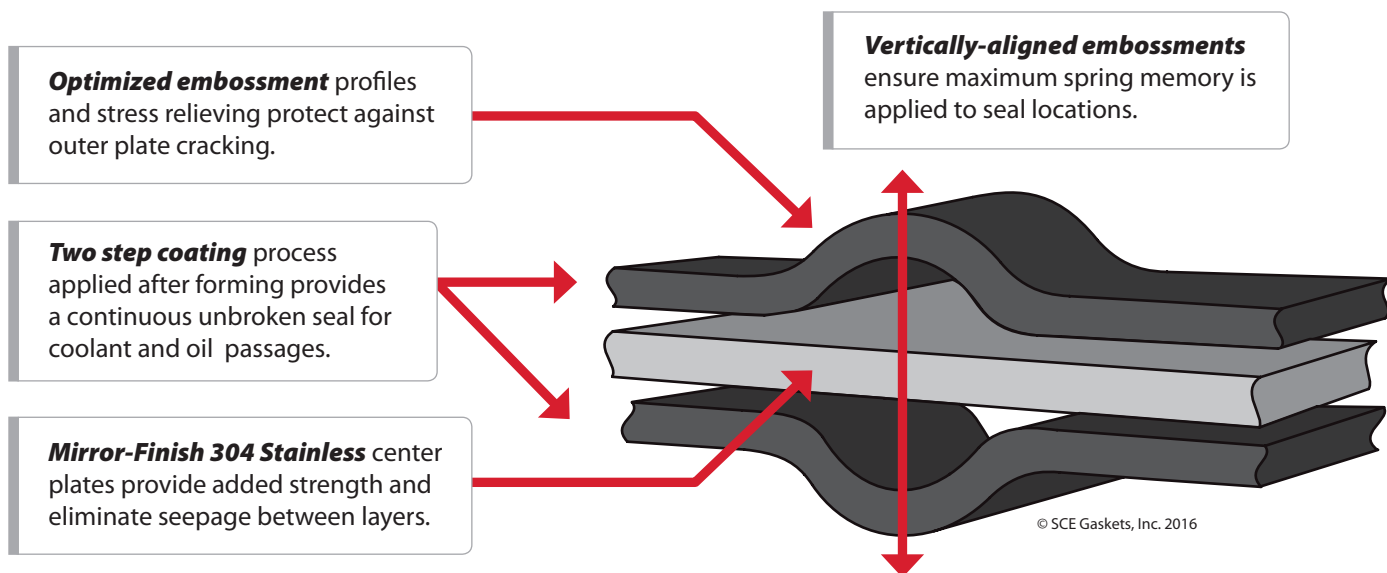

Fluid Sealant Coating is applied in a two step process **after** the outer gasket plate embossments are formed and stress-relieved. This proprietary method provides a continuous, unbroken coating that seals up to 60RA surface finishes on block and heads.

3 to 5 Layers of 300 series stainless steel **suitable for marine use.** Embossed & coated outer plates apply localized pressure to seal cylinder bore apertures, coolant and oil passages. Mirror finish inner plates provide overall strength and thickness variations.
